3.3 REPORT OF THE SUPERVISORY BOARD

Message from the Chairman of the Supervisory Board

Dear reader,

I am pleased to present you this Report of the Supervisory Board which describes its activities during 2018.

The Company has concluded the last legacy issues. On July 26, 2018, the Company signed a Leniency Agreement with the Brazilian Authorities (CGU and AGU) and Petrobras. This agreement enables SBM Offshore and Petrobras to normalize business relations in respect of tenders, with SBM Offshore now being able to effectively compete for new business in Brazil with immediate effect. Furthermore, on September 1, 2018 SBM Offshore signed an agreement with the MPF in order to settle on the alleged improper sales practices before 2012. The required approval of this agreement by the Fifth Chamber was granted in December 2018. A joint request to the court to formally close the Improbability lawsuit filed by the MPF in 2017 has been made. SBM Offshore also reached a final settlement of its Yme insurance claim. For the financial details in relation to the closure of these legacy issues, I refer to note 4.3.1 Financial Highlights.

2018 has also been a positive year for the Company from a commercial perspective. SBM Offshore has been awarded the contracts for ExxonMobil's second Liza FPSO offshore in Guyana. Following FEED and subject to requisite government approvals, project sanction and an authorisation to proceed with the next phase, SBM Offshore will construct, install, lease and operate the FPSO for a period up to two years, after which the FPSO ownership will transfer to ExxonMobil. This second Liza FPSO is based on the Company's Fast4Ward™ program which enables it to transform the business by reducing cycle time to energy deliver, de-risking of projects and improving quality and safety for its clients. Fast4Ward™, as a product offering, is maturing in the market. On the basis of increased client interest and better demand visibility, the Company has committed to build its second Fast4Ward™ hull.

The Supervisory Board supports the increasing focus of the Company with respect to the preparation for and the potential impact of the energy transition as well as the approach of the Company to integrate sustainability in its strategy and operations.

For further details about the activities of the Supervisory Board and its committees, I refer to the next sections of this chapter.

THE SUPERVISORY BOARD

Composition

Your Supervisory Board has seen a number of changes in 2018. Both Frans Cremers and Lynda Armstrong stepped down after the Annual General Meeting of April 11, 2018 after having served for eight and four years respectively. The Supervisory Board has elected Floris Deckers as its Chairman of the Supervisory Board. Francis Gugen was re-appointed for a third term (two years) ending at the 2020 AGM. When deciding on the proposal to re-appoint Francis Gugen, the Supervisory Board has taken into account his past performance and it was concluded to be important to retain the experience Francis Gugen brings as Chairman of the Audit and Finance Committee. The Supervisory Board welcomed Roeland Baan and Bernard Bajolet who were newly appointed at the 2018 AGM. In accordance with best practice 2.2.2 of the Corporate Governance Code, for all (re-)appointments the profile and competency matrix for the Supervisory Board have been closely observed.

Independence

All Supervisory Board members are independent from the Company within the meaning of best practice provisions 2.1.7 to 2.1.9 inclusive of the Dutch Corporate Governance Code with the exception of Sietze Hepkema, who was a Management Board member of SBM Offshore until his appointment as Supervisory Board member in April 2015. None of the Supervisory Board members serve on the Management Board of a Dutch listed company.

Furthermore, members of the Supervisory Board visited the Monaco Office and a Supervisory Board meeting took place at the Schiedam Office in 2018 in order to gain greater familiarity with the SBM Offshore organization and the activities of the respective sites. Both the Management Board and the Supervisory Board spent time on training on various relevant subjects.

In August 2018, the Supervisory Board assessed the profiles and the competencies of the individual Supervisory Board members. In addition, the Supervisory Board conducted a self-assessment in Q4 2018. The Supervisory Board assessed the performance of its committees and its individual members, as well as the performance of the Management Board and its individual members during an executive session. In general, it is concluded that the Supervisory Board and its committees work well, have a balanced composition and are complementary in competences and experience and is positive about the performance of

the Management Board. The practice introduced in 2018 to spend more time outside the meetings to further develop as a team was appreciated and will be continued. In the light of the importance of the energy transition to gas and renewables, the Company's strategy on this subject was considered to be a subject for the Supervisory Board for frequent and ongoing future discussion. In the year, as in previous years, a number of one-to-one conversations took place between the Chairman of the Supervisory Board and the CEO, as well as other Management Board members. Furthermore, there were regular contacts between the committee Chairmen and their respective counterparts in the

Management Board on various topics. As done in previous years the Management Board performed a self-assessment on its functioning by means of a survey, the results of which were discussed in a meeting.
